

RESEARCH: Uses of Radioactive Isotopes

1. Use the Internet to research the modern uses of 10 radioactive isotopes.
2. Make a list of your research.
 - On the top line, list the isotope.
 - On the second line, briefly describe the use of the isotope.
 - On the third line, list of the source of your research.
 - Skip a line between each of the 10 isotopes.
3. If you use the same source for all of your items, you may write the source once and then write *Ibid.* on the subsequent source lines.
 - *Ibid.* is a Latin term that means the source is the same as the preceding source.
4. You may type your research, or you may put your answers on notebook paper.
