

Evernote is an awesome note-taking and organizational tool! You'll use it for your lab portfolio and tons of other ways for class. You can use Evernote on your laptop, iPhone, Android phone, iPad, Mac book - it's great!

1. Create an Evernote account using the email you told me you would use to create your Evernote account. **It must be an email account you use to receive emails!**
  - [www.evernote.com](http://www.evernote.com)
2. Watch this video on ways to use Evernote in class.
  - Video: [How I Use Evernote with Students!](#)
3. Practice creating a notebook in Evernote
  - Right click on word "Notebook" and type in name of your notebook - C4 Chemistry (change to your class and period!!)
4. Explore Evernote and then practice using it - creating notes, etc., adding them to your notebook(s), etc.
  - A) Create **three different** types of notes or other Evernote "items"
  - B) Explore these links to find ways to create notes and use Evernote for your classes
    - o [6 Ways to Use Evernote to Dominate Your Classes](#)
    - o [5 Tips to Use Evernote for Academic Achievement](#)
    - o Video: [How I Use Evernote for College](#)
    - o Search You Tube and [Evernote.com](http://Evernote.com) for other ways you can use Evernote
  - C) Create a Work Chat with me in your class folder to show me the three things you did. My email is [tskinner@ncstrojans.com](mailto:tskinner@ncstrojans.com). Here's some help if you need it, or you can explore Work Chat on your own!
