

# Isotopes RESEARCH

## *Uses of Radioactive Isotopes*

1. Use the Internet to research the modern uses of 10 radioactive isotopes.
2. Make a list of your research. On the top line, list the isotope. On the second line, briefly describe the use of the isotope. On the third line, list the source of your research. Skip a line between each item.
3. If you use the same source for all of your items, you may write the source on the first item, and then write *ibid.* on the subsequent source lines.
  - *ibid.* is a Latin term that means the source is the same as the preceding source.
4. You may type your research, or you may put your answers on notebook paper.
