

# STARS

Web Post Comment Ideas

**Use the following Ideas to analyze your weekly performance in Chemistry or Physics. Be careful that your comment is about your class and that it does not come across as frivolous, whining, or ranting.**

- S** – Struggle: What did/do you struggle with and what did/are you doing about it to overcome your struggle? (Answer BOTH parts!)
- T** – Triumph: What did you do well this week and why? (Answer BOTH parts!)
- A** – Application: Make an application of what you learned this week. (Answer BOTH parts!)
- R** – Reflection/Rate: Reflect and rate yourself from 5 – 0 stars on either the week, or something you've done in the week & reflect why. (Think deeply. Answer BOTH parts!)
- S** – Serious questions about class content or class format, etc., or serious and good answers to other students' questions (Questions or answers must have at least two parts!)
- \*\*** If you only comment that you enjoyed something in class or that you liked something, or if you come across as whining or ranting, etc., you will only receive partial credit for your web post comment – probably a 50 or lower.
