

# Evernote .. or Google Drive ... or One Note ...

There are lots of technology tools that will make your learning in Chemistry more efficient.

Evernote is an awesome note-taking and organizational tool! You can use Evernote on your laptop, iPhone, Android phone, iPad, Mac book - it's great! And there are other great tools out there!! There's a ton you can do with Google Drive to make your learning more efficient.

Here's your assignment:

1. Explore one of the tools – either Evernote or Google Drive or another tool that you may have, to find ways to use it for your classes.

(Below are some videos I found for using **Evernote**)

- o [6 Ways to Use Evernote to Dominate Your Classes](#)
- o [5 Tips to Use Evernote for Academic Achievement](#)
- o Video: [How I Use Evernote for College](#)
- o [How I Use Evernote with Students!](#)
- o Search You Tube!

(Below are some resources I found for using Google Drive)

- o [How to Use Google Drive as a Student](#)
- o [How to Use Google Calendar for School](#)
- o [10 ways Google Keep can help streamline life at school](#)
- o Video: [Simple organization system for school/work/life | Google Keep & Calendar](#)
- o Search You Tube!

2. Choose Evernote, Google Drive, or One Note, etc., and . . .

- o Create a Chemistry notebook (or folder) that you share with me (*If you choose Google Drive, you've already done this step!*)
- o Do three different "organizational things" and describe these (list them) in a new note you create
  - In Evernote you will Create a Work Chat, share a folder, etc., with me in your class folder to show me the three things you did. My email is [tskinner@ncstrojans.com](mailto:tskinner@ncstrojans.com).
  - In Google Drive you can just type the description of the 3 things in a doc and put it in your Chemistry Shared Folder
