Chemistry & Physics Technology Overview

You will be using technology several ways to facilitate your learning. Here's an overview of some of the resources.

NCS Chemistry & Physics Website

- http://tskinnersbec.edublogs.org/

- This is our class website. I'll post daily vodcasts of class lectures, class materials such as labs and projects, reminders, etc. In addition, our class website is a great resource for links to online tutorials and interactive reviews.

Canvas

- This is like Grand Central Station for all your school stuff – a hub for all of your classes, weekly activities, grades, etc.

Remind.com

- This is a safe way for me to text the entire class with info about due dates, help sessions, project info, etc.

- All students (and/or a parent) must join the class group by texting me at the appropriate number below, and then responding to the next text sent to you with your first and last name. Parents are encouraged to join as well!!

- **All Regular Chemistry Classes:** Send a text message to this number, **81010**, with this message: **@chemncs** (*Or to receive messages via email, send an email to chemncs@mail.remind.com.*)

- **Honors Chemistry Class:** Send a text message to this number, **81010**, with this message: **@hchemncs** (*Or to receive messages via email, send an email to hchemncs@mail.remind.com.*)

- **Honors Physics:** Send a text message to this number, **81010**, with this message: **@physxncs** (*Or to receive messages via email, send an email to physxncs@mail.remind.com.*)

Google Drive

- This is one of two places where you will turn in lab reports and other projects. Later on we'll walk through setting up your Assignment Turn-In folder in Google Drive. You'll also need this app on your phone right away. Sign in with your @ncstrojans email.

Turnitin.com

- This is the second of the two places where you will turn in lab report and other projects.

Scannable App (for iPhones) and Google Drive App Scanner or FastScanner App (for Android)

- Use on your phone or tablet for scanning with lab reports and other assignments. SUPER USEFUL!!! You can never take a picture with your phone and submit it as an assignment.

Evernote

- An awesome note-taking and organizational tool! You'll use it for your lab portfolio and whatever else you find useful. Later on we'll work together to set up your free account and then walk through using Evernote for class.
