

Academic Integrity Statement

In any form of research or academic work, the value of what is produced depends on the honesty and integrity of the person who creates it. This assignment is an opportunity for you to grow as a researcher by completing all work honestly and ensuring that it reflects your own effort.

Completing this project with integrity means you must be able to clearly explain and defend your thinking in every part of your work.

The agreement below outlines the expectations for academic integrity, appropriate use of artificial intelligence (AI) tools, and responsible authorship for any research assignment. You must review and sign this document at the beginning and end of the assignment as a **declaration of your commitment to integrity in your work and as a testimony that you have fulfilled your commitment.**

Assignments that do not have both signed statements will not be accepted.

Academic Integrity Expectations

By signing this agreement, I declare that all work I submit will be my own original work.

- I will follow exactly all the guidelines described in the *AI Use in Chemistry Research* information sheet and will only use AI in ways allowed by this assignment. I will not use AI to generate answers, conclusions, or writing to submit as my own.
- I will properly cite all sources, including text, images, data, and ideas and will not copy, summarize, paraphrase, or reproduce material from any source without proper attribution.
- I will not use any part of any work from another person for this assignment, nor will I allow any person to use any part of my work.
- I will not submit any part of this assignment or whole assignment that is written or revised by another person or service (ghostwriting).

SIGN AT THE BEGINNING OF RESEARCH

I understand and will abide by the expectations regarding AI use, plagiarism, and ghostwriting. I will approach each step of the research process with honesty and integrity, developing my own questions, doing my own research, evaluating information carefully, and forming conclusions that reflect my own thinking and effort.
